REASONS FOR ALLOWANCE

1. This office action is in responsive to the paper filed on August 15th, 2007.
2. The following is an examiner's statement of reasons for allowance:
 - The claimed invention is an electrosurgical generator having a virtual control panel for controlling functionality of the electrosurgical generator in response to interrogation of an object interacting with a control panel image.
 - The claimed method include a limitation "a display surface structure having a display surface upon which the control panel image is located; a sensor positioned relative to the display surface structure to interrogate an interaction of the object with the control panel image at a location on the display surface separated from the sensor and to supply an interaction signal indicative of interaction of the object with the control panel image".
 - The combination of prior art of record does not expressly disclose or suggest the "method" with the feature of "a display surface structure having a display surface upon which the control panel image is located; a sensor positioned relative to the display surface structure to interrogate an interaction of the object with the control panel image at a location on the display surface separated from the sensor and to supply an interaction signal indicative of interaction of the object with the control panel image".
 - The references of record, either individually or in combination form, do not disclose the limitation, "a display surface structure having a display surface upon which the control panel image is located; a sensor positioned relative to the display surface structure to interrogate an interaction of the object with the control panel image at a location on the display surface
